**KSC ENVIRONMENTAL CHECKLIST REVISED:** The KSC Environmental Checklist, KSC Form 21-608, has been revised. The new form is the result of collaboration between NASA and the Air Force and is a joint document that will be used by both agencies to accomplish initial environmental reviews of proposed projects and activities. The use of a joint form will speed processing and ensure uniform reviews regardless of a project's location (e.g. KSC or CCAFS). A KSC Checklist should be completed and processed for all new activities and projects as required by the National Environmental Policy Act (NEPA) and 14 CFR Part 1216.306(D)(7) and (8). The completed checklist should be forwarded to TA-C3 for review and processing. A Record of Evaluation Consideration (REC) will be prepared and returned to the signatory that details the environmental requirements that apply to the proposed activity or project. Detailed instructions and other related information can be found on the Environmental Program Offices' web site along with the downloadable form at <http://environmental/Nepa/checklist.htm>. (TA-C3)

**NUTRITION TIP OF THE WEEK FROM THE KSC FITNESS CENTERS: Should you take a vitamin supplement?** According to Nancy Clark, a Registered Dietitian and Sports Nutritionist, you can get many of the vitamins you need from your diet. For example, drinking 12 ounces of orange juice will provide 200% of the recommended dietary allowance of Vitamin C. However, if you eat fewer than 1500 calories per day, one multivitamin and mineral pill might be good. Whether you take a supplement or not, you still need to eat well. The best sources of important nutrients are fruits and vegetables. Some with the most vitamins are: oranges and orange juice, cantaloupe, strawberries, kiwi, bananas, green and red peppers, broccoli, spinach, tomatoes, carrots, and sweet potatoes. Including these "power" foods in your diet is always recommended. (TA-C2)
